Helps young people  
improve their lives

[www.education4life.world](http://www.education4life.world)

## WHY

There are more young people in developing countries than ever, and many grow up without a proper education and will end up without gainful employment.

In Africa and Southeast Asia, around 36 million youth are unemployed. In Central and South America, a similar situation exists.

Often these young people grew up in rural areas, after which they moved to big cities, hoping to find employment and drag their families out of perpetual poverty.

In order to find employment, these young people need knowledge and vocational skills, which they often lack.

## AIM

**We support vulnerable young people to complete a vocational education, leading to a better life for them and their families**

## METHODS

In the countries where the Foundation operates, we work together with local focal points, who work as volunteers in selecting, supporting and supervising the students. These focal points connect the Foundation to the students receiving support.

**We work with a small and informal network of expert volunteers**

## ABOUT US

Education4Life is a small foundation that helps young people in accessing and completing vocational education, allowing them to gain knowledge and skills, leading to employment and a dignified life.

The Foundation supports vulnerable young people (aged 10-25) in developing countries who have limited opportunities to escape poverty and to fulfil their potential.

The foundation provides financial support for vocational education and training. After completing their education, these young people will be able to build a better life for themselves and their extended families.

**Education for a better future**
